Mid Cap Equity represented by Russell Mid Cap Index. Small Cap Equity represented by Russell 2000 Index. Non-US Equity represented by MSCI World ex U.S. Index. Emerging Markets represented by MSCI Emerging Markets Index. L/S Equity represented by Credit Suisse Long/Short Equity Index. Managed Futures represented by Bloomberg Barclay CTA Index. Commodity represented by Bloomberg Commodity Index.

Total Plan Analysis

Observations: Singing River Health System Employees' Pension Plan & Trust

Performance and Observations

- The total investment program net of fees gained **3.4%** for the December quarter. This compares favorably to the **2.9%** return of your weighted indexes as detailed in your Policy Benchmark. After deducting all plan expenses the assets are up **3.2%**.
- Over the last twelve months the program returned **11.6%** net of fees, outperforming the **11.1%** gain of the Policy Benchmark.
- The active managers' outperformance over the last year exceeded their investment fees. Much of the outperformance was generated by your Equity managers, who in aggregate were up **21.2%** compared to the equities portion of your policy benchmark that returned **17.4%**. A second source of strength in the program came from III Credit Opportunities, up **10.9%** net of fees for the year and well ahead of the **7.5%** gain of the index.

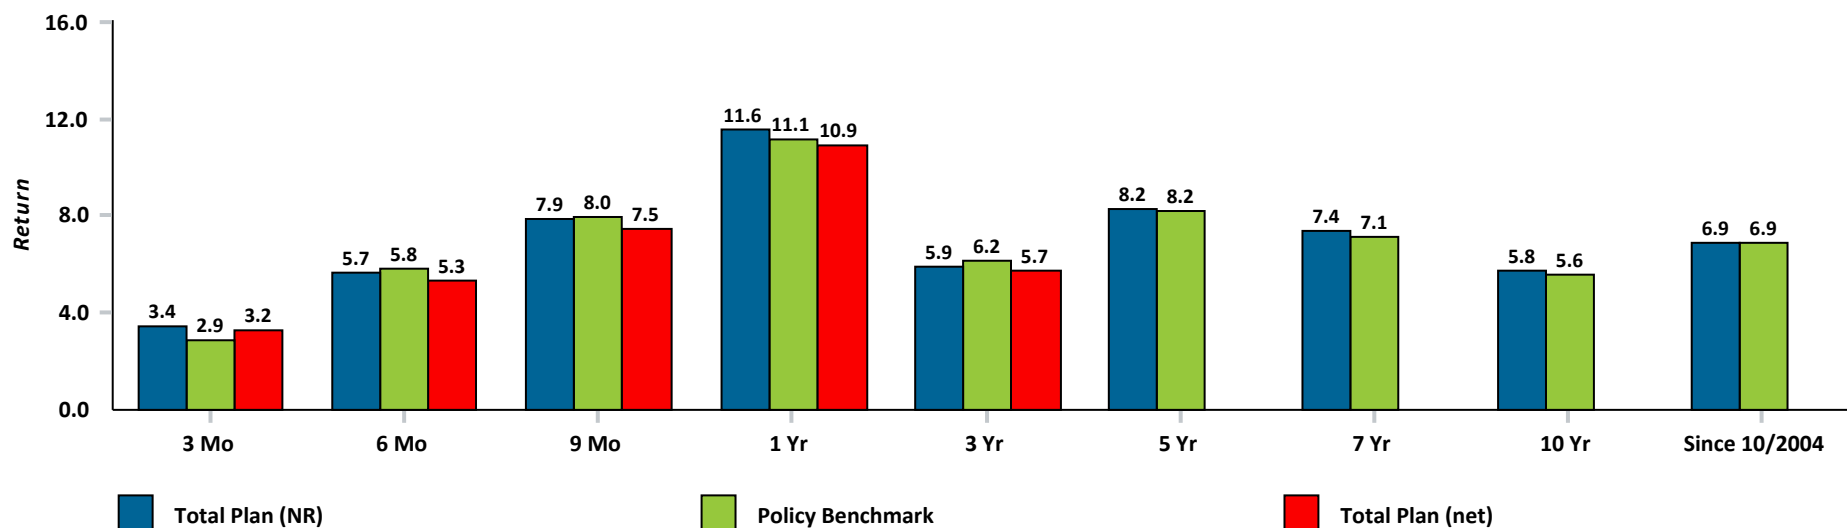

Probation or Watch List

- The Schroders Commodities portfolio earned **4.2%** during the fourth quarter of 2017, behind the **4.7%** gain of the Bloomberg Commodity Index. The Fund was placed on Probation during the second quarter of 2015. This strategy is on Probation pending a potential decision to remove sensitivity to inflation (CPI) from the liabilities of the Plan.
- Lazard Emerging Markets fund was placed back on probation in November 2017 due to relative underperformance in a strong market, but recognizing the fund was selected for it's low volatility in a highly volatile asset class. For the last three months, the fund earned **3.8%** compared to the **7.5%** return of the MSCI Emerging Markets Index.

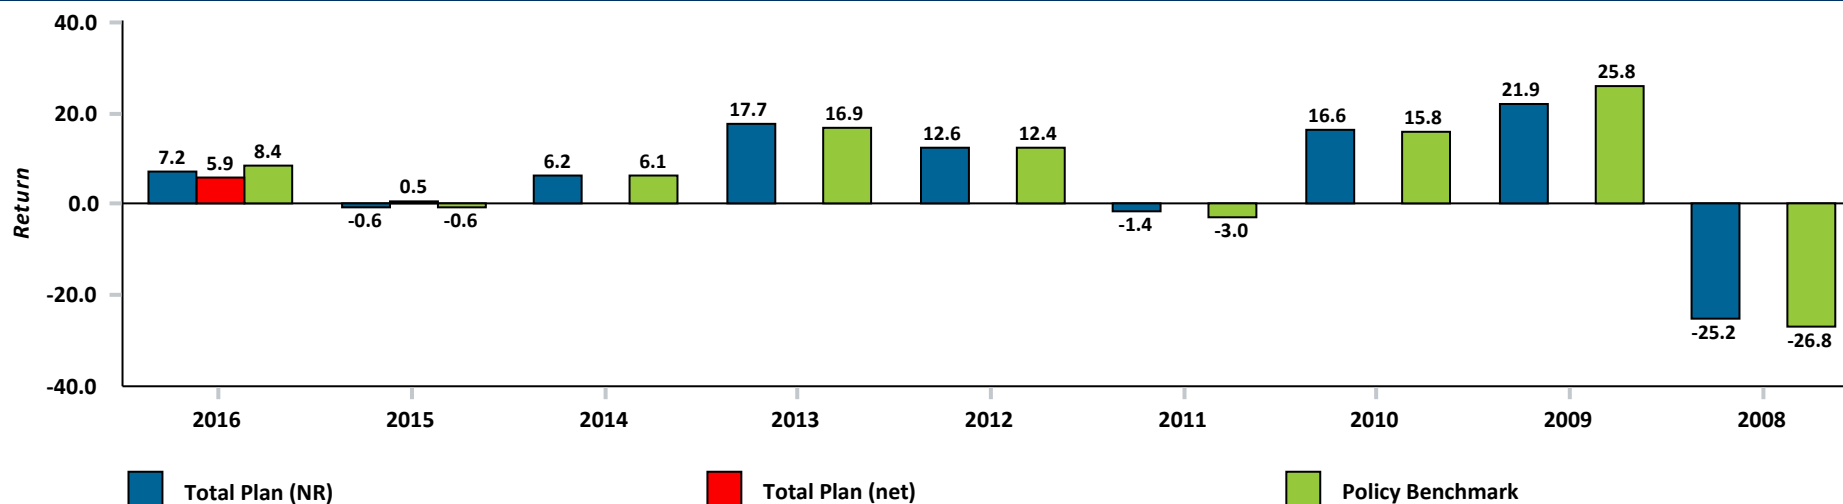

Recommended Actions

- No recommended actions.

Singing River Health System Employees' Pension Plan & Trust Fee Analysis

12 Months Ended 12/31/2017

Estimated Annual costs	Dollars
Estimated direct plan costs	
Consulting (FiduciaryVest)	\$63,333
Custody (Trustmark)	69,164
Actuarial Services (TRS)	51,200
Administrative Services (TRS)	412,066
Investment Services Fee (TRS)	0
Investment Services Credit (TRS)	(97,528)
Legal (TRS)	81,361
Audit (TRS)	133,203
Investment Management	215,431
Total estimated direct costs	\$928,229
Indirect costs	\$790,848
Total assets	\$123,842,770
Costs as a percent of assets	1.39%

Notes:

Consulting fees invoiced by FiduciaryVest in the twelve months ending 12/31/2017.

Actuarial, Administrative, Legal, Audit and Investment Service fees represent actual fees deducted from plan by Transamerica in the twelve months ending 12/31/2017. Investment Services fee is net of credits from revenue sharing.

Trustmark custody fees estimated based on current fee schedule.

Investment Management is comprised of the direct investment management fees paid to separate account managers. Managers' fees are computed from the applicable formula, whether or not they were paid during the quarter. Indirect costs are comprised of commingled and mutual fund fees. These fees are computed based on total expense ratio which includes investment management, custody, commissions and other costs of the fund. They are not actual negative cash flows but are embedded in the fund performance, and are shown here as an indication of the total investment program cost.

Unless specifically stated, performance time periods are 5 years. If the fund history is less than 5 years, the time period is since fund inception.

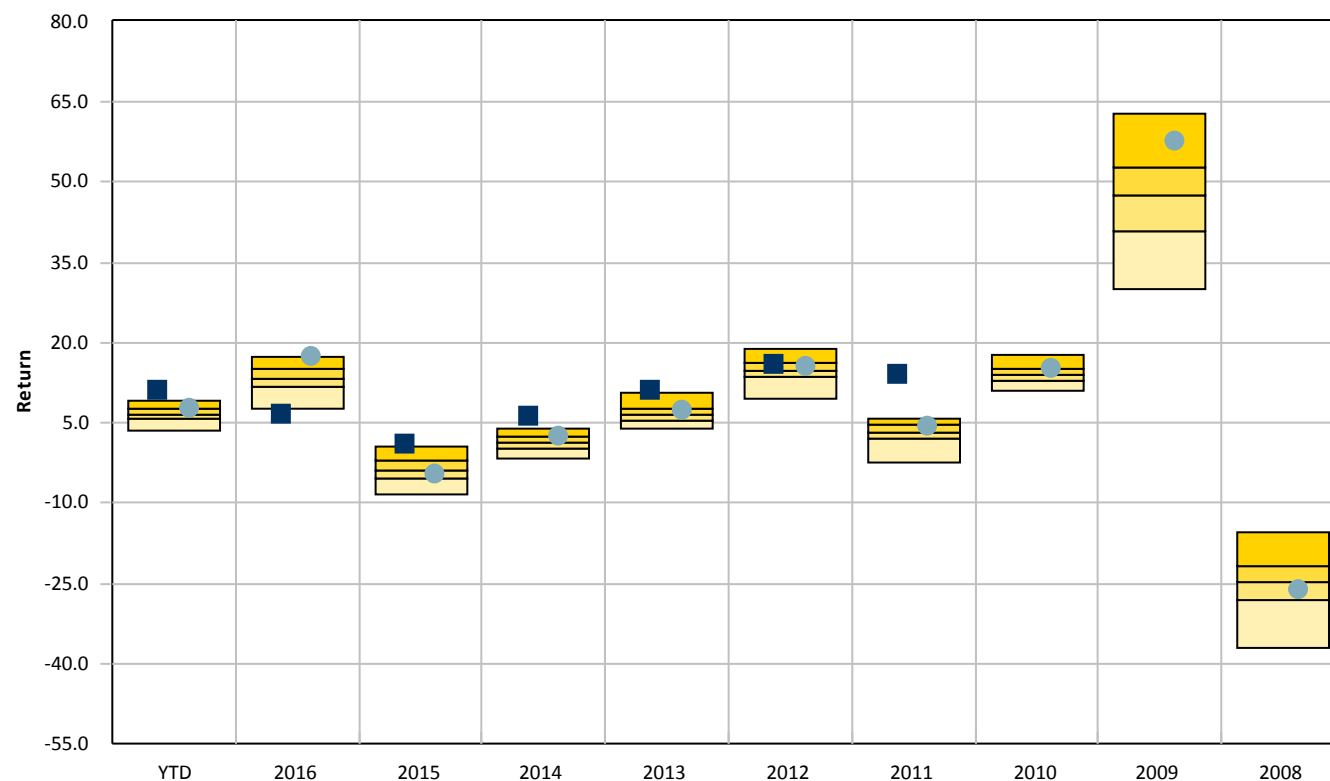

Trailing Returns

Investment Strategy

Firm's equity investment philosophy is based on the premise that the most effective way to create and sustain wealth in the equity markets is to achieve an asymmetric pattern of returns over time, where the portfolio demonstrates a down market beta which is considerably less than its up market beta.

Trailing Returns

Investment Strategy

Strategy focuses on producing attractive, consistent earnings growth by owning a select group of businesses that possess long-term secular growth opportunities, predictable revenue and earnings growth, superior pricing power and global reach. Such companies are identified through bottom-up fundamental research process.

Trailing Returns

Investment Strategy

Mid cap growth domestic equity separate account. Invests in companies with market capitalizations greater than \$1 billion and less than \$10 billion. This class of stocks may present moderately more risk than larger more established companies. Strategy exploits price volatility to purchase business temporarily "on sale" for reasons DGI believes will have de minimis impact on the long-term value-creating potential of the business.

Unless specifically stated, performance time periods are 5 years. If the fund history is less than 5 years, the time period is since fund inception.

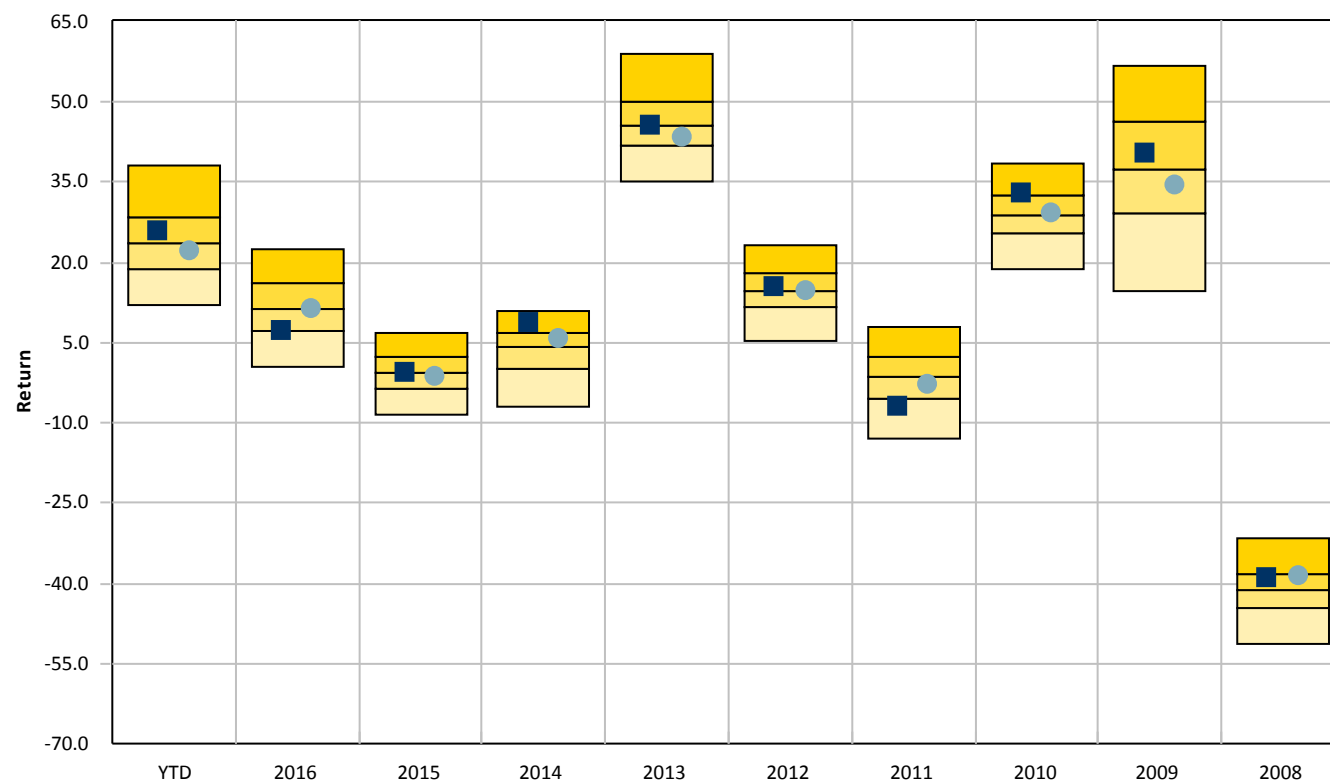

Trailing Returns

Investment Strategy

Investment seeks to generate high, uncorrelated returns that are tail-risk aware by investing in distressed and defaulted emerging markets corporate, sovereign and quasi-sovereign securities. Approach is driven by bottom-up, intensive credit analysis combined with a top-down perspective. Hedged with a dynamically managed global basket of credit default swaps (CDS).

Trailing Returns

Investment Strategy

The Schroders Commodity fund aims to give investors a diversified exposure to commodities primarily through commodity futures. Although index unconstrained, this is an enhanced beta product with the return objective of outperforming the average of the four main commodity indices with lower volatility. Peer universe is Managed Futures Hedge Funds.

Trailing Returns

Investment Strategy

Investment objective is to seek capital appreciation by allocating assets among a select group of alternative asset managers employing long/short equity and fixed income strategies in pursuit of attractive risk-adjusted returns consistent with the preservation of capital. Allocation decisions are implemented by primarily investing in private investment vehicles (hedge funds) managed by portfolio managers. Peer universe is long short equity hedge funds.

CLIENT REPORTS VERSUS CUSTODY STATEMENTS

Any client report provided by FiduciaryVest LLC is not intended to replace your brokerage / custody / partnership statement(s), which should be considered your official record for all pertinent account information. It is important to receive and review such statements. Please notify your custodian(s) promptly if you do not receive statements (at least on a quarterly basis). The statistical analysis in your client report was prepared by FiduciaryVest, LLC from data provided by: (a) third-party investment institutions performing under service agreements made directly with FiduciaryVest's clients and/or (b) other custodians who report such data to said client-contracted custodians and/or (c) one or more investment database provider-organizations, under service agreements between FiduciaryVest and those providers. FiduciaryVest does not audit, or independently verify the accuracy of such third party-provided data; in addition to statistics, "data" may include, but is not limited to the reported existence of, valuation of, and accounting for client-owned investment assets. Accordingly, although FiduciaryVest endeavors to deal exclusively with competent, reputable third-party data providers and takes reasonable care to prepare accurate statistical reports to its clients, FiduciaryVest disclaims responsibility for any errors, inaccuracies, or derived damages caused by incomplete or inaccurate data, or other information received from such sources.

COMMENTARY

Commentary was prepared for clients and prospective clients of FiduciaryVest LLC. It may not be suitable for others, and may not be disseminated without written permission. FiduciaryVest does not make any representation or warranties as to the accuracy or merit of the discussion, analysis, or opinions contained in commentaries as a basis for investment decision making. Any comments or general market related observations are based on information available at the time of writing, are for informational purposes only, are not intended as individual or specific advice, may not represent the opinions of the entire firm and should not be relied upon as a basis for making investment decisions. All information contained herein is believed to be correct, though complete accuracy cannot be guaranteed. This information is subject to change without notice as market conditions change, will not be updated for subsequent events or changes in facts or opinion, and is not intended to predict the performance of any manager, individual security, market sector, or portfolio. This information may coincide or may conflict with activities of any client's underlying portfolio managers or with actions taken by individual clients or clients collectively of FiduciaryVest for a variety of reasons, including but not limited to differences between and among their investment objectives. Investors are advised to consult with their investment professional about their specific financial needs and goals before making any investment decisions.

HOLDINGS

The information provided in this report should not be considered a recommendation to purchase or sell any particular security, pursue any particular investment approach or strategy, or engage a particular investment manager and is intended for informational purposes only.

INDEXES/BENCHMARKS

FiduciaryVest uses commercially available, subscription databases, in order to obtain data on market indexes and to research and evaluate mutual funds, investment management firms and their products. FiduciaryVest takes reasonable care to utilize industry appropriate market benchmarks for the asset class shown.

INVESTMENT PERFORMANCE

Past performance is not necessarily indicative of future results. The performance information reported herein may be for a variety of products which have different methods of presenting performance data. Generally, mutual fund returns are reported net of operating expenses; separate account manager and total portfolio returns are reported gross of fees. The fee and expense information for a specific holding is contained in the product prospectus or offering materials. The cumulative effect of fees and expenses may substantially reduce the return earned relative to that indicated herein. Please visit the Employee Benefit Security Administration (EBSA) website for an example demonstrating the long-term effect of fees and expenses.

INVESTMENT RISK

FiduciaryVest does not represent, warrant, or imply that the services or methods of analysis employed can or will predict future results, successfully identify market tops or bottoms, or insulate client portfolios from losses due to market corrections or declines. Investment risks involve but are not limited to the following: systematic risk, interest rate risk, inflation risk, currency risk, liquidity risk, sociopolitical risk, management risk, and credit risk. In addition to general risks associated with investing, certain products also pose additional risks. This and other important information is contained in the product prospectus or offering materials.

Glossary of Important Terms

Statistics	Definition
Alpha	- A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. It is a measure of the portfolio's historical performance not explained by movements of the market, or a portfolio's non-systematic return.
Best Quarter	- The best of rolling 3 months(or 1 quarter) cumulative return.
Beta	- A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of a portfolio's non-diversifiable or systematic risk.
Consistency	- The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. The higher the consistency figure, the more value a manager has contributed to the product's performance.
Down Market Capture	- The ratio of average portfolio return over the benchmark during periods of negative benchmark return. Lower values indicate better product performance.
Excess Return	- Arithmetic difference between the managers return and the risk-free return over a specified time period.
Information Ratio	- Measured by dividing the active rate of return by the tracking error. The higher the Information Ratio, the more value-added contribution by the manager.
Maximum Drawdown	- The drawdown is defined as the percent retrenchment from a fund's peak value to the fund's valley value. It is in effect from the time the fund's retrenchment begins until a new fund high is reached. The maximum drawdown encompasses both the period from the fund's peak to the fund's valley (length), and the time from the fund's valley to a new fund high (recovery). It measures the largest percentage drawdown that has occurred in any fund's data record.
R-Squared	- The percentage of a portfolio's performance explained by the behavior of the appropriate benchmark. High R-Square means a higher correlation of the portfolio's performance to the appropriate benchmark.
Return	- Compounded rate of return for the period.
Sharpe Ratio	- Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is the absolute rate of return per unit of risk. The higher the value, the better the product's historical risk-adjusted performance.
Simple Alpha	- The difference between the manager's return and the benchmark's return.
Standard Deviation	- A statistical measure of the range of a portfolio's performance, the variability of a return around its average return over a specified time period.
Tracking Error	- A measure of the standard deviation of a portfolio's performance relative to the performance of an appropriate market benchmark.
Up Market Capture	- The ratio of average portfolio return over the benchmark during periods of positive benchmark return. Higher values indicate better product performance.
Worst Quarter	- The worst of rolling 3 months(or 1 quarter) cumulative return.
