Market Commentary

BACK TO WORK!

Well...Perhaps Not So Fast

At this time a year ago, the US was dipping its toes into the delights of on-street drinking and dining with one or two family and friends. A limited-mingling-Thanksgiving lay just ahead. But, on the bummer-side of October 2020, creation and distribution of a Covid vaccine was not in the cards; months earlier, prominent bioscientists had cautioned that such a development was surely years away.

Airlines, cruise lines and hotels were about one level above being lights-out dormant.

Convention gatherings, performing arts, professional golf and cheering throngs in sports stadia all languished in a fug-get-about-it zone. Institutional education functions had been reduced to an on-screen experience, to the extent it took place at all.

In the workforce, Covid was extremely unfair. There was of course an unprecedented demand for overtime-exhaustion level healthcare workers and high risk, mostly blue-collar jobs that required 100% on-site workers, such as

midwestern meat packers, grocery and drug store employees. For millions of others whose on-site presence was not required, white-collar, pajama-clad workers sat at home computers, participated in virtual meetings and delivered near normal job performance.

Meanwhile, the US stock market shot upward on an astounding run, following its five-week [2/12 to 3/23] 37% Dow Jones "Covid-crash". The late April 2020 surge turned out to be a never-look-back skyrocket that made the March crash into a straight down, but temporary blip, especially among NASDAQ's technology shares.

In September 2008, we had seen the US Congress emerge from an emergency economic briefing that "sucked the air out of the room" following an abrupt financial-sector collapse. Likewise, the spring of 2020 again saw the Congress in bipartisan panic about prospects for an economy-wide, government-ordered shutdown of countless business operations

Congress swung into an unaccustomed bipartisan working mode that produced a new avalanche of cash "stimulus" payments to many/most working Americans.

caused by a worldwide virus for which there was no medical preventative, or treatment. So, Congress swung into an un-accustomed bipartisan working mode that produced a new avalanche of cash "stimulus" payments to many/most working Americans, and to most of their employers and to state and local governments. After a predictably rocky start, it worked mostly according to intentions.

But then, as the worst economic stagnation began to ebb and un-freeze in late 2020, the Congress re-doubled those cash distributions. And, in early 2021, they did it a third time. The immediate-impact "Covid relief" legislative packages enacted into law total \$5.3 trillion¹. The last of these bills was a nearly \$2 trillion package that was the most controversial of all the Covid bills, because it provided direct cash payments to a large majority of individuals, regardless of their economic need, or absence thereof. In addition, it extended the monthly payout of beefed-up benefit amounts delivered under the unemployment compensation structure.

Bizarre Economic Wrinkle

As discussed above, the economic stage had been set for a well-tended, very costly sail

¹ Not to be confused with *pending* legislation for "infrastructure", \$1.0 trillion, and new welfare entitlements, \$3.5 trillion

Back to Work! October 2021

through the pandemic shutdown. But something hard to believe had happened on the way to 2021 workplace recovery: job openings in nearly all industries were cascading down the chute so fast that many jobs remained unclaimed. And, as of now, they are still open.... vast numbers of them. This, despite the fact that big box retail employers, notorious for their huge, predominantly minimum-wage workforces suddenly increased their starting minimum pay by a large percentage. Nearly all manufacturing employers are unable to get necessary raw materials from their laborstarved suppliers and, even when they succeed on the supply-side, their own labor shortages gum up normal production volume. And, in between those labor-challenged employers, there are the shippers who cannot adequately staff their trucks, ships and planes. More than a half-million transport jobs are now unfilled, according to the US Dept of Transportation.

The deep economic disruption that occurred in 2008 caused a sharp spike in the number of people seeking, but not finding employment. Not so in 2021. The unemployment rate in September was actually good... 4.8% and falling. But, that good-getting-better *percentage* is not mostly caused by more people finding jobs. Instead, it's because the number of people currently being paid to work + those who are seeking work (i.e., *the Labor Force*²) is shrinking. In fact, the Labor Force as a percentage of the

eligible Population² has been steadily declining for most of the last 20 years. Very recently, we have experienced a pronounced Labor Force down-spike. As things stand now, almost 40% of the eligible job holders and self-employed are not even seeking to earn an income, while millions of advertised jobs go unfilled. Not since about 1970, has there been such a low Work Force percentage of the eligible. Please see the graph below.

The Fed Continues to Rule

The 13-year US Federal Reserve manipulation of essentially all things financial not only continues but was recently amped-up to create and deliver a fresh avalanche of new 2020-21 Covid-fighting dollars (a 116% new-dollars increase,

September 2021, that eligible number (100%) was 261.8 million people. The *employed Labor Force* was 153.7 million [58.7% of

since January 2, 2020). The Fed's process first creates, then lends those new dollars to the US Treasury, by way of open market purchases of the Treasury's newly issued and existing debt and Treasury-guaranteed home mortgage-backed bonds. It's a pretty slick system: every new dollar is automatically deemed to have the same purchasing value as every "old" dollar. So, every week the Fed goes to market makers and buys bonds, using mostly new-born dollars. It

works every time.
Sellers of those bonds
have never (yet)
insisted upon a
discount for
accepting payment in
new dollars.

Meanwhile, the
Treasury comes out
well, because the
Fed's charter requires
it to pay back to the
Treasury its net
interest income

FIDUCIARY VEST

collected from the Treasury on its bond holdings. As of September 30, 2021, the Fed's bond investment assets amounted to just below \$8 trillion. By comparison, in late September 2008 (the beginning of this program), the Fed's bond holdings amounted to a mere \$0.5 trillion, a 16-fold expansion. Today, the Fed's buying program is still adding bonds every month, at its

eligible] and the *unemployed Labor Force* people seeking jobs was 7.7 million [4.8% of el

² The *Population* eligible for work = above age 15, US resident, non-military, who live outside of institutional confinement; in

Back to Work! October 2021

accustomed \$1.4 trillion annual rate, although it has indicated that its buying volume will probably be reduced, by some amount, beginning sometime later this year. The bond market has predictably responded by modestly beginning to fidget with interest rates.

Make no mistake; this 13-year, off-and-on money creation scheme is not only unprecedented, it is now deeply embedded and institutionalized among central banks and market makers worldwide; therefore, its unwinding, if attempted, will likely be a homeward journey without a compass, made especially delicate because it will necessarily pressure market interest rates higher amid unpredictable, uncontrolled global economic conditions and market-maker reactions. Why would such a successful money-creation regime be unwound? Indeed, it amounts to an ordained Belief System, shared among the world's leading fiat currency issuers [led by the dollar, euro, yen and pound-sterling issuers]; it appears to be unimpeachable; it offers total control over currencies, and it offers complete financial flexibility and accountability, all without much, if any need to deal with market forces.

Not so fast.... There is a serious and rapidly expanding challenger to the Belief System's trusted dependability: *cryptocurrencies*. Unless the fiat currency-world's governments can

manage to regulate and de-fang the cutting edges of blockchain technology, it appears that the cryptos will soon emerge as a credible threat to the free-wheeling respect that is accorded to fiat currencies. A significant volume of transactions is occurring, and their pace is accelerating.

At last, inflation awakens

Beginning in 2012 (i.e., not long after the Fed's bond-buying program got to center-stage), the Ben Bernanke-led Fed officially began to target a 2% annual inflation rate, as a partial goal of its responsibility to manage monetary policy. The Fed was never very straightforward about its new inflation targeting regime, but indications were that the Fed had been so spooked by the 2008-09 threat of de-flation that it came to believe a modest inflation rate is the appropriate tool for continuously fulfilling its Congressional Charter mandate to maintain "stable prices". Because of the Fed's 2009-untilnow massive bond-buying program, inflation rates (and interest rates) have been below 2%, for most of the last 10 years.

That was then; this is now. The CPI-U index's inflation rate, across nearly all categories of consumption, has spiked from around 1.7% in early 2021 to a steady 5%+ in every month since April. Despite Fed Chairman Powell's springtime pooh-pooing of the potential for any longevity in the inflation spike, the economy seems to be

proving him to be off the mark. Moreover, everyday consumables such as gasoline and food are posting fierce price increases which predictably produce an almost forgotten public sense of "inflation expectation thinking." For various chain-linked reasons, those expectations naturally beget more inflation, notwithstanding technical news to the contrary.

China in change

Despite its perch as the world's 2nd largest economy, which is home to the world's 2nd largest number of billionaires³, communist-governed China is officially categorized as an "emerging market" country. How is that? The answer seems to be the ranking of a country's *GDP per capita*. The US, for example, recently ranks 8th and China ranks only 79th, according to the World Bank. China's two largest stock exchanges (Shanghai and Shenzhen) have a combined recent market value of not-so-tiny US\$8.6 trillion, compared to the NYSE's \$29 trillion.

The MSCI China Index is composed of 5 share classes, representing 740 corporate shares; "B" shares are quoted in foreign currencies and open to foreign investors and some large China companies have ADRs, or shares traded outside of China. The Index return for the quarter ended September 30, 2021, was -18.1% and -16.6% YTD. China's two mega-companies are

 $^{^3}$ Source: 2021 World Population Review, US billionaires = 724; China = 698; World total is >2,700.

Back to Work! October 2021

Tencent Holdings (TCEHY: \$341B) and Alibaba Group (BABA: \$277B).

China's currently significant regulatory re-org is in process, up and down the social spectrum. US advisors are generally rating China shares as currently requiring a risk premium return.

Covid redux

The world's battle with pandemia is laboring under a second surge delivered by Covid's so-called delta-variant which tends to strike people who escaped the first version and also many who have already been vaccinated. Meanwhile, in the 9 months year-to-date, vaccinations are progressing by the millions.

Since the beginning of the always on-screen Covid-counts being published and maintained minute by minute, we have always considered the data reporting to be little more than raw information having neither perspective, nor impact measurement. This writer determined that the most meaningful Covid data ought to measure Covid's death rate, and more specifically the death rate by age groups, because it was clear, early-on, that the age 65+ demographic group was suffering a heavy, tragic death rate that was many times higher than that of younger ages. The agephenomenon was therefore a logical category to produce a higher death rate which was easily understood by hospital physicians, because older covid patients often had pre-existing, diseased vital organs. Another general condition that became a prominent death-cause is obesity.

Please see our table of various death-focused covid statistics, below.

AGE REALLY MATTERS

U.S.	POPULATIO	ON .	COVID-19 DEATI	HS as of 10/6/2021	VACCINATIONS as of 10/14/2021*			
Age Groups	Millions of People	Percent of Total	INDIVIDUAL DEATHS	% of TOTAL	Age Groups	% VACCINATED		
up to 17 18 - 29	126	52%	499 3,739	2% 6%	up to 39	43%		
30 -39 40 - 49	45 40	12%	10,877 27,172	4% —	40 -49	71%		
50 - 64	63	19%	122,500	17% 18%	50 - 64	78%		
65 -74	32	10%	157,673	22%	65 - 74	91%

source of population and COVID death data: STATISTA and FiduciaryVest, LLC source of vaccination data: U.S. CDC and FiduciaryVest, LLC

*% of people who had at least one dose

KEY FACTS SUMMARY

In the US, approximately 2 people out of every 1,000 have died of COVID-19 (0.2% of Population)

Over half of the U.S. population is under age 40, while only 17% is age 65+.

BUT, ALMOST 8 OF 10 COVID DEATHS HAVE BEEN AGE 65+ (over half of deaths were 75+) DESPITE THE FACT THAT MORE THAN 86% OF 65+ AGE GROUP HAS BEEN VACCINATED.

CONTRAST: 64% of U.S. is UNDER AGE 50, BUT they represent only 6% of COVID deaths.

COMMENTARY

Commentary was prepared for clients and prospective clients of FiduciaryVest LLC. It may not be suitable for others and should not be disseminated without written permission. Managed Futures represented by Bloomberg Barclay CTA Index. Commodity represented by Bloomberg Commodity Index.

Total Plan Analysis

Observations: SRHS Employees' Retirement Plan & Trust

Performance and Observations

- •The investment program declined **0.6%** (net of investment fees) this quarter, underperforming the policy benchmark loss of **0.3%**. For the fiscal year the investment program is up **22.7%** (net of investment fees), ahead of the policy benchmark's **20.5%** return.
- •The returns net of investment fees over the trailing one, three, five, seven, and ten years are all ahead of the policy benchmark and are ahead of the 6% long term objective.
- •Over the last twelve months the outperformance is attributable to both asset allocation and manager value added. The asset allocation is due to the underweight in bonds and overweight in equities compared to the investment policy targets. The manager value added is a result of the managers in total outperforming their respective benchmarks, net of investment fees.

Probation or Watch List

- •<u>Nuance Mid Cap Value</u> declined **0.8%** this quarter, ahead of the **1.0%** loss of the Russell Midcap Value Index. The strategy is ahead of its index and peers for all periods three years and longer.
- •<u>Disciplined Growth Investors</u> avoided a loss this quarter, outperforming the **0.8%** decline of the Russell Midcap Growth Index. Over the last twelve months the strategy outperformed its index, climbing **45.4%** compared to the **30.5%** return of the index and ranking in the top 2% of its peers.
- •The <u>Gramercy Distressed Opportunities Fund II</u> returns net of fees remain at a slight loss since inception. The manager anticipates the majority of the remaining investments will return capital over the next twelve months. They have reduced their fee by onethird.

Notes:

^{*}Represents payments to: BXS Insurance, Jonah Blum Production, McCloud Consulting/Administrative Services.

⁻Actuarial Services, Custody, Benefits, Admin, Auditor, Legal, Investment Consulting, Investment Management and Special Fiduciary expenses represent actual amounts deducted from/contributed to the Plan during the trailing 12 months.

⁻Direct Investment Fees are comprised of the direct investment management fees paid to separate account managers. Managers' fees are computed from the applicable formula, whether or not they were paid during the year.

⁻Indirect Investment Fees are comprised of commingled and mutual fund fees. These fees are computed based on total expense ratio which includes investment management, custody, commissions and other costs of the fund. They are not actual negative cash flows but are embedded in the fund performance, and are shown here as an indication of the total investment program cost.

⁻Costs as a percent of assets includes both estimated plan expenses and estimated investment fees.

Investment Strategy

Strategy seeks long-term capital appreciation through investing primarily in equity securities of companies organized in the US that the team believes are high quality, though temporarily out of favor. Securities are selected using a quantitative screening and fundamental research process that identifies leading businesses selling at a discount to fair value and that have the potential to generate above average rates of return over time.

Russell Midcap Growth Index

Investment Strategy

Mid cap US equity separate account. Invests in companies with market capitalizations greater than \$1 billion and less than \$10 billion. This class of stocks may present moderately more risk than larger more established companies. Strategy exploits price volatility to purchase business temporarily "on sale" for reasons DGI believes will have de minimis impact on the long-term value-creating potential of the business.

Trailing Returns

HFN Distressed Index

Investment Strategy

Investment seeks to generate high, uncorrelated returns that are tail-risk aware by investing in distressed and defaulted emerging markets corporate, sovereign and quai-sovereign securities. Approach is driven by bottom-up, intensive credit analysis combined with a top-down perspective. Hedged with a dynamically managed global basket of credit default swaps (CDS).

Introduction

This document refers to the Singing River Health System Employees' Retirement Plan and Trust (the Plan and Trust) and the fund from which benefits are paid to its beneficiaries. The Trust was established in 1983 to provide retirement benefits for employees of the Singing River Hospital System (SRHS). Originally, the plan was an employer-directed defined benefit plan. The SRHS Board of Trustees appointed Plan Trustees to oversee the Plan and Trust. On October 19, 2015, by order of the Chancery Court of Jackson County, Mississippi (the Court), a Special Fiduciary was appointed to take possession of the Trust property and to administer the Trust, including all plan assets and property. The Special Fiduciary is the Plan's sole trustee and is granted all power and authority prescribed by the Trust and consistent with the *Mississippi Uniform Trust Code, Miss Code Ann. § 91-8-101, et seq.*

This document is intended to serve as a reference tool, operating investment guidelines, and a communications link between the Plan and Plan Trustee and:

- The Plan's investment managers,
- The Plan's investment advisor and
- The Plan's other professional advisors

This document records the Special Fiduciary's logical and diligent process of study, examination, evaluation and conclusions about the most suitable combination of investment risk level and rate of return objectives which will satisfy both the Plan's present and future benefits obligations and the Trust's ongoing ability to fund them.

This policy document establishes the specific guidelines for action, and also conveys the philosophical foundations for those guidelines.

Plan Overview

The Plan is a defined benefit pension plan, which bases its benefits upon an employee's highest average quarterly compensation from SRHS for the 19 consecutive quarters, plus the last quarter of employment during the last 40 consecutive quarters of employment. An employee's number of years of service also determines his or her retirement benefit. The benefit amount may be revised under order of the Court.

Taxation

The Plan has qualified for exemption pursuant to Section 401(a) of the Internal Revenue Code as a governmental plan. As such, the Plan's investment returns are not subject to current income taxation.

Funding Resources and Obligations

The Plan's contribution resources previously came from employer contributions made by SRHS and from mandatory employee contributions of 3% of annual compensation, up to the limits established by Federal regulations. Pending the legal outcome, an agreement may be reached where SRHS resumes contributions to the Plan.

Liquidity Needs

The Special Fiduciary and the professional advisors expect to periodically review and update their understanding of the Plan's forecasts of cash disbursement for Plan benefits and expenses, so that the elements and time horizon(s) of the Plan's investment program can be adjusted, as needed and appropriate for that context.

Roles and Responsibilities

The Court has delegated certain responsibilities, as outlined in the Plan document, for the Plan described here to the Special Fiduciary, who recommends and implements the investment policy with regard to asset allocation, manager and custodian selection and portfolio supervision. The Special Fiduciary reports to the Court regarding the status of the Trust. The Special Fiduciary shall act as a prudent investor respecting that individual assets of the Trust must not be evaluated in isolation, but in the context of the Trust portfolio as a whole and as part of the overall investment strategy having risk and return objectives reasonably suited to the Plan.

Special Fiduciary Duties with respect to Plan operations and administration

- Ensure the Trust is operated for the exclusive benefit of participants and their beneficiaries taking into account the interest of both the current and future beneficiaries.
- Ensure expenses paid out of the Trust are appropriate and reasonable.
- Ensure Trust assets as accounted for and periodically audited.
- Ensure Trust reports are maintained and periodically reviewed.
- Ensure Trust operation complies with all state and federal laws, and the Plan and Trust documents.
- Refrain from conflicts of interest and prohibited transactions.

Special Fiduciary Duties with respect to Plan Investments

- Hire and fire investment advisor and/or investment manager(s).
- Establish and maintain the Investment Policy Statement.
- Diversify the investments of the Trust unless the Special Fiduciary determines that the Trust and the beneficiaries would be better served without diversifying.
- Establish and maintain minimum quality and diversification standards for employing investment managers as listed in **Exhibit A**.
- Select, monitor and replace (as necessary) investment managers, insurance contracts and/or any unmanaged investments.
- Approve contracts with investment managers.
- Review performance of investment funds and investment managers, relative to their benchmarks, and appropriate peers at least annually.

- Monitor all fees being paid on plan investments.
- Refrain from conflicts of interest in selecting investment managers.

Investment Goals

The overall objective of the investment program is to achieve a rate of return in the Trust that, over the long term, will fund the liabilities and provide for the required benefits in a manner that satisfies the fiduciary requirements of the Plan.

The Special Fiduciary recognizes that financial markets are cyclical and that:

- the beginning points, ending points and magnitude of market cycles cannot be predicted; and
- there is no relationship between market cycles and calendar or other time periods commonly used for performance measurement and evaluation.

The long-range goals (greater than 5 years) of this investment plan are to:

- 1. Meet the pension benefit obligations to the Employees
- 2. Exceed the return of a Policy Benchmark comprised of the appropriate market indexes reflecting the Plan's asset allocation (see **Exhibit B**)
- 3. Perform in line with comparable pension plans on a risk-adjusted basis
- 4. Match or exceed the assumed discount rate used by the plan's actuary

Total fund, asset class, and individual investment manager performance will be compared to appropriate passive market indices and a universe of peers. The performance benchmarks used may differ from those outlined in **Exhibit B**. Investment performance is reviewed and analyzed over multiple time periods allowing for greater variance from this policy's objectives over periods shorter than three years for each investment fund and over five years for the total fund.

Asset Allocation Strategy

Please see **Exhibit B** for Asset Allocation Targets and Allowable Ranges Around Target Allocations.

Using asset allocation studies based on long-term historical capital market performance, the Special Fiduciary finds the target mixtures of asset classes in **Exhibit B** appropriate to produce the desired performance at acceptable fluctuation levels over time for the portfolio.

The Asset Allocation schedule shown in **Exhibit B** of this Investment Policy provides for allowable ranges within each asset class, or strategy, in order to provide investment managers some flexibility in asset allocation to meet the goals of this Investment Policy.

The Special Fiduciary recognizes that a rigid asset allocation would be both impractical and, to some extent, undesirable under various potential market conditions. Therefore, the allocation of the Trust's total assets may vary from time to time within the ranges listed in **Exhibit B**, without being considered an exception to these operating guidelines.

The Special Fiduciary, with the counsel of the investment advisor, may engage active investment managers, whose goals over time are to outperform respective indices, or passive managers who seek to replicate the return of corresponding indices.

Investing Strategies and Vehicles

The Trust may invest in the following investment vehicles:

- Separately managed accounts
- Mutual funds
- Exchange-Traded Funds (ETFs)
- Commingled funds
- Collective investment trusts
- Limited Partnerships
- Foreign exempted companies

Rebalancing

Because different asset classes will perform at different rates, the Special Fiduciary will closely watch the asset allocation shifts caused by performance in the Trust. The Special Fiduciary will review the relative market values of the asset segments, and will generally rebalance the asset classes which are farthest short of their target allocations in this Policy. Rebalancing will typically occur as of any quarter-end at which the allocations reach a point where they are out of target ranges.

Unallocated Cash

Investment managers performing under this Policy are not expected to accumulate a significant cash position without prior approval of the Special Fiduciary. If the basic investing style of a particular manager includes a routine, temporary use of instruments having a maturity of less than one year, they must inform the Special Fiduciary and agree to the use of that investing style in advance.

Investment Performance Evaluation and Review

Frequency of Measurement

The Special Fiduciary will measure investment performance quarterly, or more often, as deemed appropriate.

Expected Interim Progress Toward Multi-Year Objectives

The Special Fiduciary will generally follow the time horizons set forth in this policy, when making judgments about performance. However, Investment Managers for the Trust should be advised that the Special Fiduciary intends to track their interim progress toward multi-year goals. If the Special Fiduciary finds (or is professionally advised) that performance is substandard, then the Special Fiduciary's reviews of such a manager may disregard the time horizon concept for purposes of considering possible actions.

Investment Managers hired by the Special Fiduciary shall generally be expected to outperform an appropriate market benchmark and perform well against a universe of their peers over multi-year time periods.

Corrective Action Guidelines

Corrective action should be taken as a result of an ongoing investment manager review process. The following are instances where corrective action or termination may be in order:

- Major organizational changes in a firm, including any changes in portfolio managers,
 may require a new contract and interview process. Failure on the part of the
 Investment Manager to notify the Special Fiduciary of such changes is grounds for
 termination. At all times, communication with the managers should be open and
 informative. Investment Managers should be willing and able to meet at least annually
 with the Special Trustee.
- 2. Violation of terms of contract constitutes grounds for termination.
- 3. Surges in portfolio trading volume.
- 4. As part of its overall asset allocation strategy, the Special Fiduciary will choose managers with certain styles and approaches to provide portfolio diversification. Therefore, it is critical that managers adhere to the original intent of the Special Fiduciary at the time they are engaged. Any significant changes in investment approach may be grounds for termination.

- 5. Performance patterns not logically explainable in terms of the published style, or performance out-of-step with manager's style peer group.
- 6. The manager's performance will be viewed in light of the management firm's assigned investment style and approach, keeping in mind at all times the Trust's diversification strategy as well as other organizational and relationship issues. Decisions to terminate managers are solely within the discretion of the Special Fiduciary.
- 7. Investment managers may be replaced at any time as part of the overall restructuring of the Plan.
- 8. Other events or circumstances that are deemed to be in the best interest of Trust, its participants and beneficiaries, or the Plan.

VII. Policy Adoption

Singing River Health System Employee's Retirement Plan and Trust Special Fiduciary

Executed th	ne day of	, 20
Signature:		
	Traci M. Christian	
Title:	Special Fiduciary	

Exhibit A Specific Portfolio Constraints

The following standards apply to all investment portfolios that are separately managed. The Special Fiduciary recognizes that any pooled investment vehicle or mutual fund cannot be subjected to these requirements, except to the extent these distinctions can be incorporated by the Special Fiduciary into their process of selecting such vehicles. Nevertheless, the Special Fiduciary will review investing activities in any pooled investment vehicles utilized, versus the investment policy and, if appropriate, the Special Fiduciary may accordingly decide that a particular pooled/mutual fund has ceased to be suitable.

Fixed Income

The purpose of domestic and international fixed income investments is to provide liquidity and a highly predictable, dependable source of income. Fixed instruments should reduce the overall volatility of the Trust's assets and provide a deflation hedge.

The following standards are for the separately managed fixed income accounts and are not monitored by the Special Fiduciary. Each manager is expected to confirm receipt of the standards in writing.

- **1. Quality Standards** (not applicable to a portfolio which is specifically committed to invest in High Yield Bonds)
 - Minimum: Must be rated investment-grade by at least one major rating agency
 - Maximum: No manager's portfolio allocation to the lowest investment-grade category (BBB-rated) shall be greater than the bench index allocation plus 3%
 - Weighted average (target) quality for each portfolio manager: A-rated or better

2. Duration Standards

 Maximum/Minimum: Portfolio modified duration should not be greater than (+/-) 25% of benchmark index

3. Diversification Standards

• Single security issue: Maximum 5%

- Single Sector Allocation (level 2): Maximum benchmark index allocation (+/-) 20% (except U.S. Government securities)
- Non-Index Sector Allocation (level 2): Maximum allocation to non-index sectors shall be limited to 30% of the manager's portfolio market value

4. Liquidity Standards

- Original issuance for corporate securities must be at least \$300 million, unless the Special Fiduciary approves the investment in advance.
- Securities that are thinly traded and therefore cannot be considered liquid are not permitted without prior specific permission from the Special Fiduciary.

5. Prohibited Categories for all investment managers, unless authorized by the Special Fiduciary

- Derivative instruments including, but not limited to options, futures, swaps, structured finance products, etc. in which either the inherent structure of the instrument or the nature of the transaction is leveraged, i.e. creates market exposure in excess of the market value of the underlying assets.
- Issuer affiliated with the investment manager

6. Frequency of Reporting to Special Fiduciary

• At least quarterly

Equities

1. Diversification Standards

Diversification for the total investment program is achieved through manager selection. The Special Fiduciary recognizes the value of including concentrated, high-conviction managers within the total equity allocation. Appropriately sizing each manager's allocation creates the desired diversification across the overall program.

Should any single manager's designated allocation be greater than 10% of the total program, they shall adhere to the following standards unless granted written exception

authorized by the Special Fiduciary. Such designated managers will be explicitly notified and will submit written acknowledgement of adherence to these standards.

- Market value of any single holding not to exceed 7.5% of the manager's allocation, without obtaining permission from the Special Fiduciary
- Maximum sector concentration: greater of 2.5x benchmark, or 20% of current portfolio market value

2. Liquidity Standards

- Traded on one or more national and/or international exchanges (NASDAQ, National Market, or quoted in the NASDAQ Bid/Asked section)
- \$100 million minimum market capitalization
- Managers should maintain appropriate procedures to determine their liquidity exposure
 to an individual security holding on a firm wide basis, i.e., awareness and
 documentation of what percent of normal trading volume is represented by their total
 holding for the Plan in a particular issue.

3. Proxy Voting

- Unless specifically directed by the Special Fiduciary, the managers have sole responsibility for voting proxies of shares of companies in the portfolio in a manner consistent with the best interests of the Plan.
- Managers are required to vote proxies on every issue that could be reasonably expected to have a significant impact on the value of the investment.
- Managers are required to keep a record of all proxy votes and upon request report to the Plan Trustees at least annually.

4. Prohibited Categories for all Equity managers, unless authorized by the Special Fiduciary

- Issuer related to the investment manager,
- Restricted or letter stock,
- Private placement debt, and
- Derivative instruments that create or add leverage.

Alternatives

These apply only to investment managers that have been authorized by the Special Fiduciary or previous Plan Trustees and use these categories as inherent elements within their investment programs. Examples of investment managers that may qualify for this authorization include hedge funds, real estate managers, commodities managers, and private equity managers.

- 1. Short sales, or "naked" positions should be limited to only within investments in hedge funds.
- Margin purchases, which create leverage or market exposure in excess of the market value of underlying assets, and which create asymmetric return patterns that could result in substantial losses, shall be limited to include only purchases made in hedge funds.
- 3. Real Estate investments shall be limited to pooled investments that are professionally managed to include REITs, timberland or other institutional classes of real estate portfolios.
- 4. Distressed debt securities that trade at a significant discount to the principal amount of the obligation shall be limited to include only specific investment manager mandates.
- 5. Private partnership investments shall be limited to include only investments in institutionally managed strategies that may include real estate, distressed debt, private equity, timberland and hedge funds.
- 6. Fully collateralized securities lending programs are not considered margin purchases and may be utilized, subject to a separate Supplemental Agreement approved by the Plan Trustees.

CLIENT REPORTS VERSUS CUSTODY STATEMENTS

Any client report provided by FiduciaryVest LLC is not intended to replace your brokerage / custody / partnership statement(s), which should be considered your official record for all pertinent account information. It is important to receive and review such statements. Please notify your custodian(s) promptly if you do not receive statements (at least on a quarterly basis). The statistical analysis in your client report was prepared by FiduciaryVest, LLC from data provided by: (a) third-party investment institutions performing under service agreements made directly with FiduciaryVest's clients and/or (b) other custodians who report such data to said client-contracted custodians and/or (c) one or more investment database provider-organizations, under service agreements between FiduciaryVest and those providers. FiduciaryVest does not audit, or independently verify the accuracy of such third party-provided data; in addition to statistics, "data" may include, but is not limited to the reported existence of, valuation of, and accounting for client-owned investment assets. Accordingly, although FiduciaryVest endeavors to deal exclusively with competent, reputable third-party data providers and takes reasonable care to prepare accurate statistical reports to its clients, FiduciaryVest disclaims responsibility for any errors, inaccuracies, or derived damages caused by incomplete or inaccurate data, or other information received from such sources.

COMMENTARY

Commentary was prepared for clients and prospective clients of FiduciaryVest LLC. It may not be suitable for others, and may not be disseminated without written permission. FiduciaryVest does not make any representation or warranties as to the accuracy or merit of the discussion, analysis, or opinions contained in commentaries as a basis for investment decision making. Any comments or general market related observations are based on information available at the time of writing, are for informational purposes only, are not intended as individual or specific advice, may not represent the opinions of the entire firm and should not be relied upon as a basis for making investment decisions. All information contained herein is believed to be correct, though complete accuracy cannot be guaranteed. This information is subject to change without notice as market conditions change, will not be updated for subsequent events or changes in facts or opinion, and is not intended to predict the performance of any manager, individual security, market sector, or portfolio. This information may coincide or may conflict with activities of any client's underlying portfolio managers or with actions taken by individual clients or clients collectively of FiduciaryVest for a variety of reasons, including but not limited to differences between and among their investment objectives. Investors are advised to consult with their investment professional about their specific financial needs and goals before making any investment decisions.

HOLDINGS

The information provided in this report should not be considered a recommendation to purchase or sell any particular security, pursue any particular investment approach or strategy, or engage a particular investment manager and is intended for informational purposes only.

INDEXES/BENCHMARKS

FiduciaryVest uses commercially available, subscription databases, in order to obtain data on market indexes and to research and evaluate mutual funds, investment management firms and their products. FiduciaryVest takes reasonable care to utilize industry appropriate market benchmarks for the asset class shown.

INVESTMENT PERFORMANCE

Past performance is not necessarily indicative of future results. The performance information reported herein may be for a variety of products which have different methods of presenting performance data. Generally, mutual fund returns are reported net of operating expenses; separate account manager and total portfolio returns are reported gross of fees. The fee and expense information for a specific holding is contained in the product prospectus or offering materials. The cumulative effect of fees and expenses may substantially reduce the return earned relative to that indicated herein. Please visit the Employee Benefit Security Administration (EBSA) website for an example demonstrating the long-term effect of fees and expenses.

INVESTMENT RISK

FiduciaryVest does not represent, warrant, or imply that the services or methods of analysis employed can or will predict future results, successfully identify market tops or bottoms, or insulate client portfolios from losses due to market corrections or declines. Investment risks involve but are not limited to the following: systematic risk, interest rate risk, inflation risk, currency risk, liquidity risk, sociopolitical risk, management risk, and credit risk. In addition to general risks associated with investing, certain products also pose additional risks. This and other important information is contained in the product prospectus or offering materials.

Glossary of Important Terms

Statistics	Definition
Alpha -	A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. It is a measure of the portfolio's historical performance not explained by movements of the market, or a portfolio's non-systematic return.
Best Quarter -	The best of rolling 3 months(or 1 quarter) cumulative return.
Beta -	A measure of the sensitivity of a portfolio to the movements in the market. It is a measure of a portfolio's non-diversifiable or systematic risk.
Consistency -	The percentage of quarters that a product achieved a rate of return higher than that of its benchmark. The higher the consistency figure, the more value a manager has contributed to the product's performance.
Down Market Capture -	The ratio of average portfolio return over the benchmark during periods of negative benchmark return. Lower values indicate better product performance.
Excess Return -	Arithmetic difference between the managers return and the risk-free return over a specified time period.
Information Ratio -	Measured by dividing the active rate of return by the tracking error. The higher the Information Ratio, the more value-added contributior by the manager.
Maximum Drawdown -	The drawdown is defined as the percent retrenchment from a fund's peak value to the fund's valley value. It is in effect from the time the fund's retrenchment begins until a new fund high is reached. The maximum drawdown encompasses both the period from the fund's peak to the fund's valley (length), and the time from the fund's valley to a new fund high (recovery). It measures the largest percentage drawdown that has occurred in any fund's data record.
R-Squared -	The percentage of a portfolio's performance explained by the behavior of the appropriate benchmark. High R-Square means a higher correlation of the portfolio's performance to the appropriate benchmark.
Return -	Compounded rate of return for the period.
Sharpe Ratio -	Represents the excess rate of return over the risk free return divided by the standard deviation of the excess return. The result is the absolute rate of return per unit of risk. The higher the value, the better the product's historical risk-adjusted performance.
Simple Alpha -	The difference between the manager's return and the benchmark's return.
Standard Deviation -	A statistical measure of the range of a portfolio's performance, the variability of a return around its average return over a specified time period.
Tracking Error -	A measure of the standard deviation of a portfolio's performance relative to the performance of an appropriate market benchmark.
Up Market Capture -	The ratio of average portfolio return over the benchmark during periods of positive benchmark return. Higher values indicate better product performance.
Worst Quarter -	The worst of rolling 3 months(or 1 quarter) cumulative return.
